

EXPECTATIONS FOR PARTICIPATION

The ACE Mentor Program is voluntary, offering students the opportunity to experience the Architecture, Construction and Engineering professions first hand. The program is depends on volunteer effort and money donated by industry professionals interested in the future of our industry and our young adults. The following is a list of expectations the ACE program has of its student participants:

- Students are expected to attend all meetings of their group. A draft calendar for 2011-2012 will be furnished to you. We look for timely attendance of at least 80% of the meetings and events as evidence of your interest in the program. You should contact your faculty sponsors or industry mentors in advance if you must be late or miss a meeting.
- Students are expected to exhibit maturity in dress, language and behavior during all ACE meetings and events. We want you to have fun while participating, just as we do at our work places. However it must be appropriate and respectful of the circumstances.
- Students are expected to follow all safety rules while on construction sites. All persons will be required to wear hard-soled shoes (no flip-flops or open-toes), long pants, covered shoulders (no tank tops) and hard hats that we provide. Some sites will furnish safety glasses.
- Students are expected to participate actively in the program. Asking questions, discussing points of interest, cooperating with group activities, etc. all are evidence of your participation.

Your mentors and faculty sponsors are excited to be able to offer you this opportunity. Because we have limited space, we want to accept those who will benefit the most from the program. Please review the calendar and the above expectations before you submit your application. If you feel you can meet these expectations, please apply! You will experience our industry from the inside!

Whatever you decide, we wish you the best of luck with your future.

Sincerely,

Your ACE Mentors and your high school Teacher/Coordinators.
